- Problem 10.3-13 (b) (c) For each pair of matrices $A_{1}, A_{2}$ shown, decide whether there is a permutation matrix $P$ with $A_{2}=P A_{1} P^{T}$. Either find $P$ or explain why no such $P$ exists.
(b) $A_{1}=\left[\begin{array}{lllll}0 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 0 & 0 \\ 0 & 1 & 0 & 1 & 0 \\ 1 & 0 & 1 & 0 & 1 \\ 1 & 0 & 0 & 1 & 0\end{array}\right], \quad A_{2}=\left[\begin{array}{lllll}0 & 1 & 1 & 0 & 0 \\ 1 & 0 & 0 & 1 & 1 \\ 1 & 0 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 & 1 \\ 0 & 1 & 0 & 1 & 0\end{array}\right]$.
(c) $A_{1}=\left[\begin{array}{llllll}0 & 1 & 0 & 1 & 0 & 1 \\ 1 & 0 & 1 & 0 & 1 & 0 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 1 & 0 & 1 & 0 & 1 & 0 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 1 & 0 & 1 & 0 & 1 & 0\end{array}\right], \quad A_{2}=\left[\begin{array}{llllll}0 & 1 & 0 & 1 & 1 & 0 \\ 1 & 0 & 1 & 0 & 0 & 1 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 1 & 0 & 1 & 0 & 1 & 0 \\ 1 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 1 & 0 & 1 & 0\end{array}\right]$.

Solution. (b)

$$
P=\left[\begin{array}{lllll}
0 & 0 & 1 & 0 & 0 \\
0 & 0 & 0 & 1 & 0 \\
0 & 1 & 0 & 0 & 0 \\
1 & 0 & 0 & 0 & 0 \\
0 & 0 & 0 & 0 & 1
\end{array}\right] \quad \text { or } P=\left[\begin{array}{lllll}
0 & 0 & 1 & 0 & 0 \\
0 & 0 & 0 & 1 & 0 \\
0 & 1 & 0 & 0 & 0 \\
0 & 0 & 0 & 0 & 1 \\
1 & 0 & 0 & 0 & 0
\end{array}\right]
$$

(c) The graphs corresponding to $A_{1}$ and $A_{2}$ are shown as follows. It is easy to see that $G_{2}$ contains a triangle, however, $G_{1}$ does not. Thus, no such $P$ exists.

$G_{1}$

$G_{2}$
